

**In the next school year 2017/2018 the school board will have to renewed.**

What is it the school board

The school board is an elected body consisting of 19 members, of which 8 representatives of the teaching staff, 2 of the non-teaching staff, 8 representatives of the parents and the School Director and it is presided over by one of its members, elected by an absolute majority of the members from among the epresentatives of the parents of pupils.

### **The tasks of the school board**

The school board votes on the annual program and the financial accounts and decides on the use of financial resources regarding the administration and teaching in the school.

It also decides on the following issues:

1. adoption of internal rules of the school
2. purchase, renovation and maintenance of technical equipment and scientific teaching aids.
3. adapting the school calendar to specific environmental requirements
4. criteria for the realization and planning of extra-schooling activities, inter-school activities, especially regarding school outings and guided visits
5. promotion of contacts with other schools to exchange information and experiences or for eventual collaborations
6. the participation of the school at cultural, sporting and recreational activities of a particularly educational interest
7. types of charity initiatives which can be taken up by the school

From what is described above one can understand the great importance of this organ of school governance and thus the need for an active and widespread participation of the parents to the renewal process, which will presumably take place in December. It is just necessary to underline that the participation to the renewal of any governing organ, even if a school's, is an act of democracy and responsibility, and so a erious commitment is desirable on the part of everyone, so that it can be really representative of the school population and can thus function in the best way.
